

Why AquaBubble™?

Water Softener

Experience is the primary reason to choose R.E. Prescott Co., Inc.'s AquaBubble™ Water Softener and one of its authorized dealers. Since 1954, we have built a solid reputation for providing homeowners and industry with time proven solutions to difficult water quality problems. Each AquaBubble Conditioner is professionally designed for years of high performance.

Soft water washing makes clothes cleaner, last longer and feel softer. Skin and hair will feel smoother and have more luster. Cleaning products will lather better and last longer.

Dishes and glassware will rinse sparkling clean and clear. Water lines and fixtures will not build up with mineral deposits that can restrict flow.

AquaBubble™ water softeners also remove the unsightly red rust stains of iron and the black staining of manganese. This is all done automatically with efficient use of salt. Our units are programmed to regenerate on water consumption, conserving water and salt.

The BENEFITS

Benefits of Having Soft Water:

- › Prevention of scale will result in longer lasting plumbing fixtures and appliances, including your water heater and dishwasher
- › Water heater efficiency will increase by up to 29%
- › Softer Hair and Skin
- › Cleaner, brighter and longer lasting clothes
- › Less soap scum buildup in the bathroom and kitchen

Removal of Hardness, Iron and Manganese in Solution (up to 5 ppm)

Model	Capacity	Amount Media	Peak Flow (GPM)	Backwash (GPM)
6AB30-2M	30,000	1 cu. ft.	7	2.0
6AB45-2M	45,000	1.5 cu. ft.	9	2.4
6AB60-2M	60,000	2 cu. ft.	14	3.5
6AB75-2M	75,000	2.5 cu. ft.	18	4.2

Removal Process:

- › A soft sodium or potassium ion is used to remove hard water ions of calcium and magnesium, as well as the staining ions of iron and manganese.

Standard Equipment Includes:

- › High Capacity Ion Exchange Resin
- › Fiberglass Mineral Tank
- › Full 1" Internal Piping
- › 18"x33" Brine Tank
- › Automatic backwashing control valve, capable of being custom tailored to your specific application.
- › Bypass valve (bypass connections sold separately)
- › All accessories for installing the 6AB unit and brine tank
